Change Name Servers

Name Server Details
Required to point your Domain Name to your website or email service

Name Server Details

mukhtadir.in

Point your Domain Name to your Hosting package using one of the options below.

Option 1: Configure your your Domain Name to use our Name Servers (Recommended):

- ns1.bh-2.webhostbox.net
- ns2.bh-2.webhostbox.net

OR

Option 2: Add the following records to your Domain Name's existing Name Servers

testwebhosting.com/<#Add-on Domain(s)#>	IN	MX	208.91.198.16
testwebhosting.com/<#Add-on Domain(s)#>	IN	A	208.91.198.16
*.testwebhosting.com/<#Add-on Domain(s)#>	IN	A	208.91.198.16
www.testwebhosting.com/www.<#Add-on Domain(s)#>	IN	A	208.91.198.16

Here, you would find the list of Name Servers you need to set for your domain name

Alternatively, if you wish to *retain* the Name Servers of your domain name instead of using **ResellerClub's** Name Servers, you would need to add the DNS Records listed on this page, on your *existing* Name Servers.

Brand your Name Servers

Add Child Name Servers

Domain Registration [More](#)

- Name Servers**
Manage Name Servers that this Domain Name uses
- Child Name Servers**
Manage Child Name Servers of this Domain Name
- Domain Secret**
Set the authorization code to transfer the Domain Name
- Theft Protection** ●
Protect your Domain Name from theft and accidental transfers

This is not a compulsory step and you can seamlessly use the white labeled name servers for any sites hosted. However, having branded name servers will be helpful in creating a brand for your hosting business. In case, your domain is registered with us, you need go to the domain order detail and click on Child name servers

Manage Child Name Servers
mukhtadir.in

	Host Name	IP Address		
1	<input type="text" value="ns1.testwebhosting.com"/> <small>Eg. ns.mukhtadir.in</small>	<input type="text" value="208.91.198.106"/>	<input type="button" value="Save"/>	Delete
2	<input type="text" value="ns2.testwebhosting.com"/> <small>Eg. ns.mukhtadir.in</small>	<input type="text" value="208.91.198.106"/>	<input type="button" value="Save"/>	Delete

Enter the Name Servers and IP address. Once registered, you can use these Child Name Servers in turn as name servers for registering other domain names.

Brand your Name Servers

Add A Records

01

There are multiple ways of obtaining the required IP to create child name servers: You can ping the primary domain name of your reseller hosting package or ping any one of the white labeled name servers. You can even obtain it by logging into your cPanel or WHM account.

02

Once you have created child name servers then you will also need to create corresponding A records from your DNS management interface. If you are managing your DNS from your Reseller Hosting package then you can add the A records by logging into cPanel or by accessing the edit DNS zone feature within WHM.

Please Note

If you wish to have 4 branded name servers then you will need to create 4 child name servers and correspondingly 4 A records.

Brand your Name Servers

Enter your Branded Records in the Domain's Plesk Account

Home **Users** **Websites & Domains** **Mail** **Applications** **Statistics** **Account**

Websites & Domains

This is where you set up and manage websites. If you have several subscriptions associated with your account, then you can switch from one subscription to another by selecting the required subscription at the top of the screen. Note that you can host a number of websites under a single subscription, so there is no need to purchase any additional subscriptions.

- Applications**
Install and manage web apps on your websites. Forums, photo galleries, collaboration tools, and many more installed in several clicks.
- File Manager**
Upload new files and work with current files and directories of your websites.
- Web Statistics**
View the reports on how your websites are visited: See how many people visited a site and which webpages they viewed.
- FTP Access**
Set up access to files of your websites over FTP protocol.
- DNS Settings**
Manage DNS zones for your domain names.
- Secure Your Sites**
Secure connections to your websites using SSL certificates.
- Backup Manager**
Back up and restore your domains, including settings and content of websites and mail accounts.
- Web Hosting Access**
IP Address: 199.79.62.24
Change settings of the system user account used for remote access to Panel over SSH or RDP and working with files and folders in File Manager.
- Databases**
Create and remove databases used by your websites, and manage them using integrated administrative web application.

WHMCS installation through softaculous

Obtain your WHMCS License Key

A screenshot of the Softaculous installation interface for WHMCS. The interface is a white box with a yellow border. It contains five expandable sections, each with a right-pointing arrow icon. The sections are: 'Access your plesk Account', 'Dedicated IPs', 'Name Server Details', 'Admin Details', and 'WHMCS'. The 'WHMCS' section is highlighted with a red border. The text for each section is as follows:

- Access your plesk Account**: Access your plesk account to manage your website.
- Dedicated IPs**: Purchase and manage Dedicated IPs, required to purchase SSL Certificates.
- Name Server Details**: Required to point your Domain Name to your website or email service
- Admin Details**: View login details for your Hosting Control Panel, Direct URL for your Website, etc
- WHMCS**: Manage your Free WHMCS License

Once you click on WHMCS, you get your license key. To install WHMCS you can follow this guide: http://docs.whmcs.com/Installing_WHMCS

That's It!

You are now all set to Kick-Start
your **Web Hosting** Business!
