Reseller Hosting is for everyone!

You can choose to:

01

Resell packages to your Customers & Sub Resellers

02

Buy Reseller Hosting packages yourself and Resell Custom packages to your Customers

resellerclub

How to Start Reselling Immediately!

Set Price for Reseller Hosting

Add slabs and set Telescopic Price

Give discounts to customers who buy for longer tenures.
Example: When your customer purchases for 1 month, he will be charged Rs. 1551/m, but if he purchases for 3 months or more, you can give him a discount by charging him less. However, if you do not wish to use Telescopic Pricing for your Customers, you may set the same Selling price as the 1st month for all other months

Change Name Servers

Name Server Details
Required to point your Domain Name to your website or email service

Name Server Details
mukhtadir.in

Point your Domain Name to your Hosting package using one of the options below.

Option 1: Configure your your Domain Name to use our Name Servers (Recommended):

- ns1.bh-2.webhostbox.net
- ns2.bh-2.webhostbox.net

OR

Option 2: Add the following records to your Domain Name's existing Name Servers
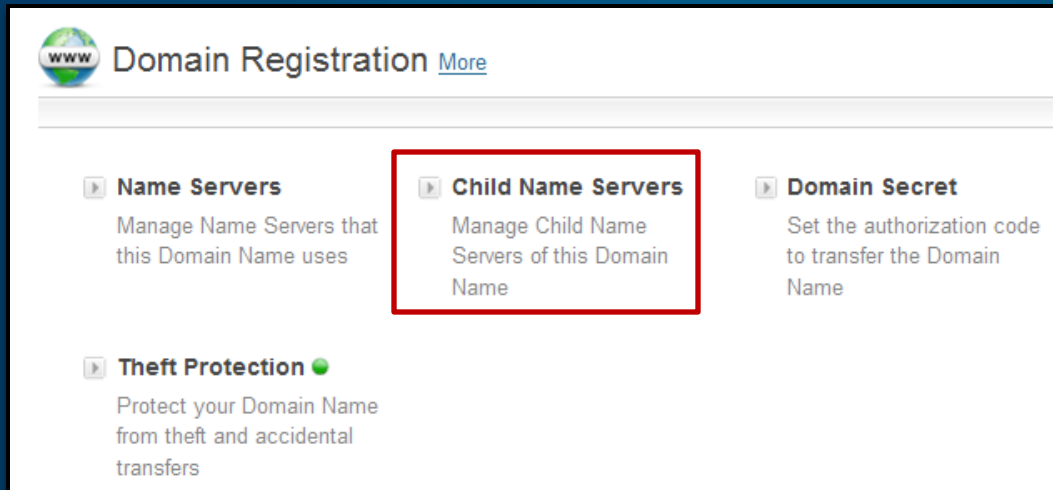

testwebhosting.com/<#Add-on Domain(s)#>	IN	MX	208.91.198.16
testwebhosting.com/<#Add-on Domain(s)#>	IN	A	208.91.198.16
.testwebhosting.com/.<#Add-on Domain(s)#>	IN	A	208.91.198.16
www.testwebhosting.com/www.<#Add-on Domain(s)#>	IN	A	208.91.198.16

Here, you would find the list of Name Servers you need to set for your domain name

Alternatively, if you wish to *retain* the Name Servers of your domain name instead of using **ResellerClub**'s Name Servers, you would need to add the DNS Records listed on this page, on your *existing* Name Servers.

resellerclub

Brand your Name Servers

Add Child Name Servers
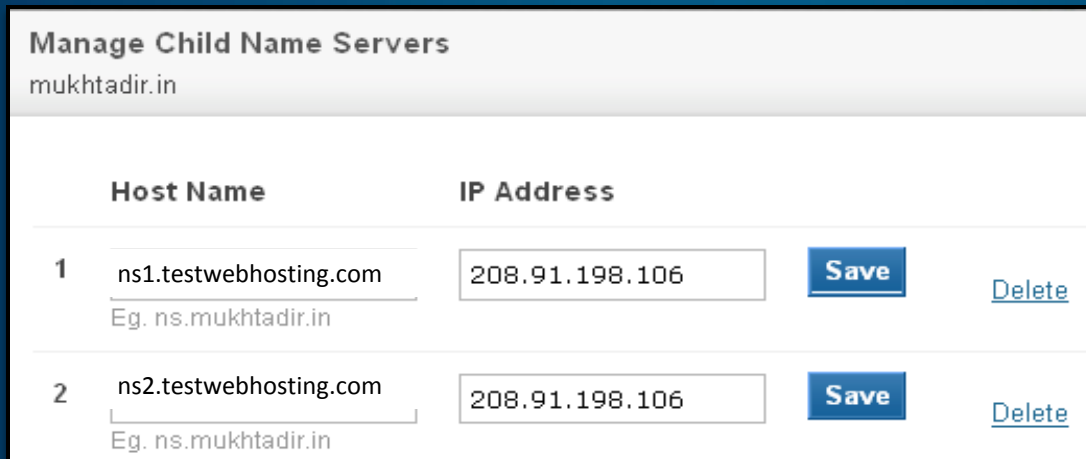

This is not a compulsory step and you can seamlessly use the white labeled name servers for any sites hosted. However, having branded name servers will be helpful in creating a brand for your hosting business.
In case, your domain is registered with us, you need go to the domain order detail and click on Child name servers

Enter the Name Servers and IP address. Once registered, you can use these Child Name Servers in turn as name servers for registering other domain names.

resellerclub

Brand your Name Servers

Add A records

01 There are multiple ways of obtaining the required IP to create child name servers: You can ping the primary domain name of your reseller hosting package or ping any one of the white labeled name servers. You can even obtain it by logging into your cPanel or WHM account.
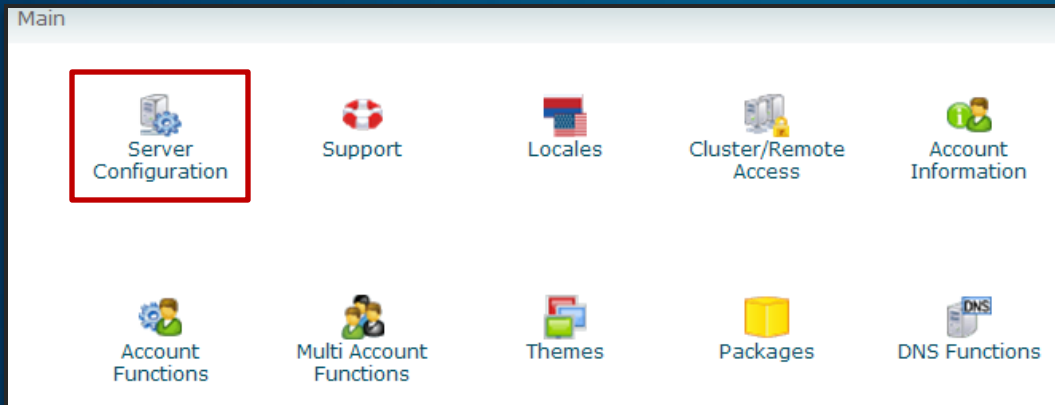

02 Once you have created child name servers then you will also need to create corresponding A records from your DNS management interface. If you are managing your DNS from your Reseller Hosting package then you can add the A records by logging into cPanel or by accessing the edit DNS zone feature within WHM.

Please note: if you wish to have 4 branded name servers then you will need to create 4 child name servers and correspondingly 4 A records.
